V3 - MODERATE BOARD VARIATION

Color, Graining & Natural Changes

Wood is a natural product that features distinct color and graining. Each board is unique in its characteristics and will vary from piece to piece. Each board can vary from a clean to rustic visual and contain large to small filled knots, sap wood, small to large filled splits and a high contrast within the natural and lighter stained visuals. These subtleties may become more distinct over time due to exposure to direct sunlight. Occasional rearranging of furniture and rugs will help reduce the potential affects of the sun.
